Hi George,

I was please to see officers earlier this week monitoring the new encampment that has spilled over across the street from the freeway onramp to Children's Bureau at Vermont and Oakwood. The encampment has steadily been growing since I last reported it to you on January 2. This morning, several of our new residence were asked to leave the front of our office while they were smoking crack without incident other than defecating at the entrance of our property.

I understand that you and law officials have their hands tied over the situation, but the area is becoming a real health and safety concern for our clients and staff. I can't also help and think that customers wanting to use the new Blue Car L.A. share program across the street are avoiding the station because of the presence of the homeless there and the shady people they attract who come by and visit them.

Anything that the council member's office can do to assist us in moving them out of the area would be appreciated.

Sincerely,

■■■■
